Implementing ISO 22301

Purpose: To learn how to develop and manage a Business Continuity Management System (BCMS) that is aligned to ISO 22301.

Audience: Those new to BCM, those responsible for developing and managing BCM program, consultants, internal audits, and risk management professionals.

Description: Implementing ISO 22301 is designed to expose the participant to all aspects of a BCM program and to be a solid "how to" guide for building a business continuity program for all types of organizations.

Student activities are included throughout the course and are designed as knowledge checks to reinforce lesson materials and to provide attendees with hands-on activities that will enable them to become familiar with and apply these principles in their jobs.

Included in the course materials are case studies, multi-media, small group activities, games, and takeaways such as sample policies, a BIA/Risk Assessment tool, case study, Open for Business Toolkit, multi-media, templates that meet ISO 22301 requirements, and more. Also includes content from ISO 22313, 22317, 22318, 22320, 22398, and 31000. Available as an entire course or as 8 individual modules available via self-study elearning and course books.

8 Lessons / Competency Areas

2000.1 Leadership & Governance

1. The BCMS—Purpose & Value

3. Internal Audits & Self-Assessment
4. Management Review

Credentials

The ISO 22301 Lead Implementer certification exam is included in BCM 2000 elearning course and BCM 3000 instructor-led course. The ISO 22301 Lead Implementer certification exam can also be challenged online without taking a course.

Certificates of learning are issued upon completion of the exam for each competency area. Exams are a combination of multiple choice and short-answer problem solving. To earn the certification requires a score of 75% or higher in each competency area. 2.1 CEUs

Developing & Managing a Business Continuity Management System

Align, Implement, Assess, and Audit BCM Programs to ISO 22301

Recognized globally for its vendor-neutral, standards-based education programs, ICOR's certification competency areas align to specific jobs or job areas in the business continuity and continuity of operations workplace.

ICOR courses meet your learning style. Take the full course or as individual competency areas. Learn from an instructor or on your own via elearning or self-study course books. Interactive activity-based curriculum.
